Norman H. Bangerter, Governor
Dee C. Hansen, Executive Director
Robert L. Morgan, State Engineer

Lewiston City Corp.
Greg H. Karren, Mayor
29 South Main
Lewiston, UT 84320

Dear Mayor Karren:

The State Engineer's office has been aware of the concern over measurements of water on the High Creek system. The High Creek users, to date, have been able to regulate the use of water between themselves. All water users are required to measure diversions under Utah Code 73-5-4, Utah Code Annotated, 1953, (copy enclosed).

Diversions that are not regulated by a commissioner appointed by the State Engineer, can be measured by the means the user feels is appropriate. The State Engineer's office can, if the situation warrants, organize a distribution system and keep records of water diversion. If you believe such a system is required, please contact me at 55 East 100 North, Logan, UT 84321, or phone 752-8755.

Sincerely,

Robert M. Fotheringham, P.E.
Northern Area Engineer
